TEAM CONTRACT
Members: Deepak Narayanan, Arjun V Narayanan, Youyang Gu

1) How will you use the in-class time?
We will make sure we're all on the same page and set/update our schedule for progress. We will also meet with our TA to make sure that we are going in the right direction. Finally, we will also just code and work on our individual tasks.

2) Where will you record who is responsible for each tasks?
We will do this in a GoogleDoc. We will check off tasks as we finish them to make sure everyone stays updated and in the loop.

3) What happens if all of you decide you want to get an A grade, but because of time constraints, one person decides that a B will be acceptable?
If the other person is totally unwilling to do A-quality work, the other two members will pick up the slack and do more of the work. We will get an A on this project at any cost.

4) Is it acceptable for one or two team members to do more work than the others in order to get the team an A?
Yes, it is. If the other two team members want an A, they should be able to work and get it.

5) What will you do if one or more team members are not doing their share of the work?
We will first talk to the person and offer any help to get him/her back on track. If the person is totally unwilling or unable to do good work, the other members will pick up the slack to get an A on the project.

6) How will work be reviewed?
We will write unit tests as we code to ensure that all our modules are being built properly. After we are finished, we will have a session where we will just test our code and make sure everything is ready for submission.

7) How will you deal with different work habits of individual team members (e.g., some people like to get assignments done as early as possible; others like to work under the pressure of a deadline)? We will try to get the work done early, forcing people when necessary. It will be better for everyone to get it done early.

8) Do you need consensus (100% approval of all team members) before making a decision? No, two out of three people agreeing is totally fine.
